

MUCHHU SAI BHARATH

Rajkot, Gujarat — +91-8074055184 — muchhusaibharath@gmail.com — [LinkedIn](#) — [GitHub](#) — [LeetCode](#) — [TryHackMe](#) — [HackTheBox](#)

SUMMARY

Computer Science undergraduate specializing in Cybersecurity, with a focus on Cloud Security and Network Security. Hands-on exposure to penetration testing fundamentals through TryHackMe and Hack The Box labs. Strong grasp of networking, Linux, and scripting, with a growing skill set in cloud platform security (AWS). Seeking a Cybersecurity / Cloud Security Intern role to apply and expand practical security skills in a real-world environment.

EDUCATION

Marwadi University	2025 – 2029
B.Tech - Computer Science and Engineering (Cyber Security) - CGPA: 8.06	Rajkot, Gujarat
Sri Junior College	2023 – 2025
Intermediate (11th & 12th) - MPC - Percentage: 86.3% (863/1000)	Vijayawada, Andhra Pradesh
Ravindra Bharathi Green School	2023
Class X (State Board) - Percentage: 71% (355/500)	Vijayawada, Andhra Pradesh

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, Bash

Networking & Security Fundamentals: TCP/IP, DNS, Firewalls, VPNs, OWASP Top 10, Vulnerability Assessment

Penetration Testing Tools: Nmap, Wireshark, Burp Suite, Metasploit, Kali Linux

Cloud Security: AWS (EC2, IAM, S3, VPC, Security Groups), Cloud Security Fundamentals

Operating Systems: Linux (Ubuntu/Kali), Windows Server Basics

Concepts: SIEM Basics, Incident Response, Threat Detection

Developer Tools: Git, GitHub, VS Code, Postman

PROJECTS

- *[Add project name, tech stack, and 2–3 bullet points once completed — see suggestions below]*

Home Lab Network Security Setup | pfSense, Snort/Suricata, VirtualBox

- *[Describe segmented network, firewall rules, and intrusion detection setup]*

AWS Cloud Security Audit Tool | Python, Boto3, AWS

- *[Describe scan for misconfigured S3 buckets, open security groups, weak IAM policies]*

Web App Penetration Test Report | Burp Suite, OWASP ZAP, DVWA/Juice Shop

- *[Describe full pentest performed and professional vulnerability report written]*

Vulnerability Scanner | Python, Nmap

- *[Describe automated scan + CVE lookup tool for a target network]*

CYBERSECURITY PRACTICE PROFILES

- TryHackMe — *[add username, rank, rooms completed]*
- Hack The Box — *[add username, rank, machines completed]*
- LeetCode — *[add username, problems solved]*
- GitHub — *[add username, repos/contributions]*

CERTIFICATIONS (PURSUING / PLANNED)

- Google Cybersecurity Certificate – Coursera / Google *[Pursuing / Completed – add date]*
- Introduction to Cybersecurity – Cisco Networking Academy *[Pursuing / Completed – add date]*
- CCNA: Introduction to Networks – Cisco Networking Academy *[Pursuing / Completed – add date]*
- AWS Cloud Practitioner Essentials – AWS Training *[Pursuing / Completed – add date]*
- TryHackMe Pre Security Path – TryHackMe *[Pursuing / Completed – add date]*
- IBM Cybersecurity Fundamentals – Coursera / IBM *[Pursuing / Completed – add date]*
